

March 5th, 2014

Blood Typing/RH and Antibody Screening Specimen Tube Change Requirement

The instrument vendor for blood typing and antibody screening at Enzo Clinical Labs and our reference laboratory for antibody identification, now require that only lavender top tubes are acceptable specimens for this testing.

Effective March 10th, 2014, we will not be able to accept yellow top tubes for these orders. Please notify your staff that only lavender top tubes can be submitted for blood typing and antibody screens.

We appreciate your cooperation and will work with you to make sure you have the proper tube types.

ANA Test Name Changes

Test Code	Current Name	New Name
3402	ANAFlex	ANAFlex without IFA
3041	Antinuclear Antibody Screen	Antinuclear Antibody Screen with Reflex to IFA
<i>**No Specimen Collection Changes Required**</i>		

Please review these changes and contact your sales or service representative or Enzo Clinical Labs at the number below if you have any questions. As always, we appreciate the opportunity to serve you and your patients.

Sincerely,

Cynthia M. Bowman, MD
Medical Director
Enzo Clinical Labs, Inc.
